FREQUENZUMFORMER BADU ECO DRIVE II

Frequenzumformer BADU Eco Drive II für 2,20 kW

Article number 2970220412
Product page https://www.speck-pumps.com/en/p/frequenzumformer-badu-eco-drive-ii-fur-2-20-kw-2970220412

Description

Everything's in the green zone. Compact frequency converter for optimal operating conditions.

Areas of use

Pool water treatment involves various operating modes, such as filtration, pool water circulation, filter rinsing, and the initial filtrate discharge, also known as final rinsing. Depending on the pipe resistance and filter speed, several operating points must be set. This can be conveniently achieved by controlling the required pump operating points to the individual operating points via an external frequency converter. The pump speed is then electronically adjusted accordingly.

Material short text

BADU Eco Drive II, 3~, 2,20 kW, IP55

Technical data

Motor & drive

Motor phases	3~
Degree of protection	IP 55

Electrics

Voltage (max.)	3~ 380-480 V
Frequency	50 Hz
Cable length	3 m

General / Product features

Product range	BADU Premium

Operating conditions & water

Umgebungstemperatur	50 ° C

Dimensions & logistics

Product width	200 mm
Product height	420 mm
Customs tariff number	85044085
