Description

Innovative technology for ambitious swimmers. With optimized performance.

Areas of use

For wall installation in all pool designs, as an attraction, for fitness, as a wave or bubble bath, or for underwater massage upon medical advice. Swimming without turning is possible even in small pools.

Version

A powerful BADU pump connected via a suction and pressure line draws water through a flush-mounted plastic housing and nozzle housing in the pool. A powerful jet of water is returned to the pool via two adjustable nozzles that can be swiveled 60° in all directions. A multitude of openings in the intake panel ensure extremely low intake flow.
