Description

Universal automatic backwash system for virtually any application. Simple and flexible to operate.

Areas of use

Depending on their size and utilization, filter systems must be flushed at regular intervals to discharge filtered contaminants into the sewer. The BADU OmniTronic electronic backwash system is a reliable and time-saving alternative to the manual backwash valve.

Technical data

Hydraulic power

Operating pressure max.	2 bar

Motor & drive

Motor phases	1~

Electrics

Power input P_1 (max.)	1 kW
Voltage (max.)	1~ 230 V
Input voltage	230 V
Frequency	50 Hz
